# The UK's premier watersports equipment

At Crewsaver we are proud of our Lifejacket heritage which has set the benchmark for quality and performance over many years.

We have yet again raised the bar on Lifejacket design with the launch of an all-new Crewfit Lifejacket aimed squarely at today's boating enthusiast. We are confident that the new range will, once more, set higher standards for performance, comfort, style and durability.

Crewsaver supports the RNLI's "Useless unless worn" message

**Useless unless worn**

## Safety at Sea Award

The Cosalt Premier 2010 Lifejacket was the winner of the Safety at Sea International Awards, in the Equipment category. The award recognises excellence in products and services that encourage and promote safety in the maritime environment.

Designed and manufactured by Crewsaver, the Cosalt Premier 2010 impressed the judges by its various patented features developed over three years and benefiting from 1,000 hours of in-water testing.

## The complete range

### Power and Sail

How to make the right Lifejacket choice	4-5
Inflatable Lifejacket options	6-7

A man with blonde, wavy hair and sunglasses is looking down. He is wearing a grey and white racing jacket with 'BOSS' and 'ALEX THOMSON' branding. He is also wearing a black lifejacket with 'ALEX THOMSON' written vertically in orange. The background shows the white sail of a sailboat.

# How to make the right Lifejacket choice

The decision as to which Lifejacket you should purchase depends very much on the style, location and conditions of boating that you intend on doing.

All our Lifejackets are designed and manufactured to a distinct set of British and European guidelines and regulations. These are in place to ensure that the difference between products classified as Lifejackets and those classified as Buoyancy Aids are clearly defined.

The most noticeable factor is the buoyancy rating (measured in Newtons). A Lifejacket must have a buoyancy rating of 100N or more. Our range of Lifejackets is split into four distinct categories: 275N Inflatable which includes the 290N and 275N range, 150N Inflatable which includes both the 190N and the 150N ranges, 150N Air Foam and 100 Foam Lifejackets.

*Alex Thomson is wearing the Crewfit 190N Lifejacket, specifically branded for the Hugo Boss/Alex Thomson Racing crew.*

## 275N Inflatable Lifejackets

This category includes the Crewfit 275N as well as the new Crewfit 290N range. Developed at the same time as our new SOLAS 2010 products – the new patent pending symmetric 290N Inflation Chamber maximizes turning performance whilst still providing mobility and comfort.

These are the highest performance devices available from Crewsaver and are designed for offshore sailing and severe conditions when maximum protection is required. They are suitable for both swimmers and non-swimmers and are the chosen Lifejacket for sailors wearing heavy waterproof clothing.

## 150N Inflatable Lifejackets

This category includes the Crewfit 190N Lifejacket range, Crewfit 150, Freedom and Crewfit Junior. These are suitable for swimmers and non-swimmers and for use in offshore waters in all but the most severe conditions.

Although still classed under the 150N standard, the Crewfit 190N Lifejacket is a higher performance product, providing increased levels of safety and re-assurance to the user. The Crewfit 190N offers faster turning times, with a wider range of clothing, making this product the new benchmark of the 150N buoyancy level.

For younger crew members we would recommend our Junior Crewfit model. These are ideal for children aged from around 5-6 to 12 years old. Heavily dependent on the child's size, we recommend that as with all Lifejackets, you should ensure a correct fit before you purchase them, or continue to use them.

## 150N Air Foam Lifejackets

These Lifejackets have 100N of inherent, permanent buoyancy provided by integral foam. An additional inflation chamber allows the buoyancy to be upgraded to 150N using an oral inflation tube. When inflated they are suitable for use in all conditions.

The Seababy, Seatoddler and Seachild products provide Lifejacket protection for the smaller crew members, while still allowing freedom of movement and comfort. The BSI gives a foolproof, maintenance free 150N product that has been a mainstay in leisure, industrial and commercial situations for many years.

## 100N Foam Lifejackets

The 100N foam Lifejacket has inherent buoyancy provided by integral foam, giving instant reassurance and security. This style of Lifejacket has no inflation chambers and is perfect for encouraging people to get on or in the water and gain confidence. These products are great for sheltered and coastal waters and can be seen on the river bank, canal side, beach or marina.

All sizes come with fitted thigh straps which need to be worn for the best performance of the jackets. Smaller sizes have additional built in underseat support to ensure effective buoyancy.

# Inflatable Lifejackets

Representing the best in British  
**quality, performance**  
and **value**

## Why choose Crewfit?

- Design – Crewfit Lifejackets are lightweight, comfortable and unobtrusive
- Style – the newly developed Crewfit 190N, with its sleek design, colours and graphics, will ensure they are worn at all times
- Service – the best you can expect from an award winning manufacturer
- Support – from an extensive worldwide network of chandlers and service agents

## Are they comfortable?

- Crewsaver Lifejackets are fitted with adjustable straps and belts, allowing them to be fitted to a vast range of sizes and still allowing total freedom of movement
- Additionally the adjustment system stops the Lifejacket riding up in the water making donning easier and ensuring the most comfortable and secure fit
- Location Toggles (fitted to some models) – allow the lifejacket to be attached to a jacket or foul weather gear for easy donning

## How safe are they in the water?

- A strong lifting becket enables speedy recovery
- Non-clog whistle, for attracting attention
- All Lifejackets are approved to European Standards
- High frequency welded and double inflation tested inflation chamber

- Inflation chamber constructed from hi-visibility polyurethane with industrial grade SOLAS Approved reflective tape for additional visibility
- Highly durable and abrasion resistant outer cover with a protective coating to guard against oil and chemical contamination
- Factory fitted thigh straps stop the jacket riding up in the water and by doing this the wearer is lifted higher and has more mobility
- Oral inflation tube for manual topping up
- An optional Lifejacket Light and Sprayhood can be fitted

Crewsaver recommend a minimum annual inspection as detailed in the Lifejacket user manual and website. If the Lifejacket is used frequently or for commercial purposes, a more regular inspection is recommended.

## What does a Crewfit offer?

- Safety – Crewsaver Lifejackets are designed to far exceed the requirements of EU legislation
- Reassurance – only the best quality materials and parts are used in its construction
- Confidence – the Crewfit is relied upon by professionals around the world
- Peace of mind – thorough testing and sampling of all components used in manufacture gives us the confidence in our product to provide a three year guarantee with each Lifejacket

# Inflation Options

## Manual

Available on Crewfit 290N, 275N, 190N and 150N

All Crewsaver Inflatable Lifejackets can be manually inflated, by the pull of a lanyard. This option allows the wearer to swim without the Lifejacket being activated automatically. This can be useful if you expect to launch or tend a craft in calm waters.

- 1 Pull lanyard
- 2 CO<sub>2</sub> cylinder is fired
- 3 Lifejacket inflates
- 4 Delivers full buoyancy in approximately 5 seconds
- 5 Can also be inflated orally

## Standard Automatic

Available on Crewfit 290N, 275N, 190N and 150N

This inflation option is available on most Crewsaver Inflatable Lifejackets. Inflation occurs automatically when the capsule is immersed.

- 1 Capsule fires within 5 seconds of entry into water
- 2 Mechanism pierces cylinder, inflating Lifejacket
- 3 Can also be inflated as manual version or orally

## Hammar Automatic

Available on Crewfit 290N, 275N, 150N and Freedom

The Hammar Inflator gives excellent protection from random activation caused by moisture, rain or wave splash. This is achieved by protecting the water sensitive element with a hydrostatic valve, which operates when submerged in over 10cm of water and, depending upon the Lifejacket style, held there for between 2 to 3 seconds.

- 1 Hammar works on water pressure, only operating when submerged in 10cm of salt or fresh water
- 2 No accidental inflation, even in extreme conditions
- 3 Cylinder is mounted on the inside of the Lifejacket inflation chamber
- 4 Re-arming instructions and key provided with each Re-arming Pack
- 5 Can also be inflated as manual version or orally

# Webbing Options

## With Harness

In addition to best practice of wearing a Lifejacket at all times, the wearing of a deck safety harness while on a sailing yacht is mandatory at night under RORC (Royal Ocean Racing Club) regulations and highly recommended by all safety at sea organisations whenever there is rough weather. When the harness is attached to the boat via a safety line (see page 19) the chances of the wearer being lost overboard is lessened, making recovery and survival more probable. Lifejackets with deck safety harnesses feature heavyweight webbing and stainless steel fittings, including a 'D' ring to which a safety line can be secured.

## Without Harness

The non-harness version is recommended for situations where being attached to the boat is more dangerous than floating free in the water. Powerboats, speed boats and RIBS (Rigid Inflatable Boats) are all examples where being towed alongside at high speed would be dangerous. The fitting of a safety light on non-harness Lifejackets is highly recommended. Non-harness Lifejackets are lighter in weight and do not have metal fittings or a safety line attachment point.

**NEW!**

# Crewfit 290N Lifejackets

The new high performance lifejacket range provides unrivaled **comfort, safety** and **support** for **extreme users**

# Crewfit 190N Lifejackets

The range of Lifejackets provide unprecedented **protection** whilst allowing total **freedom of movement** and **comfort**

## Crewfit 190N Lifejacket Range

Designed to outperform both the existing legislation and the newly introduced BSEN ISO 12402 criteria, we are confident this range raises the bar in setting higher standards for performance, comfort, style and durability.

### Performance

The Crewfit 190N range offers a level of protection that is unmatched across today's market. It features a brand new patented inflation chamber (patent pending) with dual asymmetric lobes which overlap to provide faster turning performance in the event of the user being face down and incapacitated in the water. In addition, it lifts the head further from the water whilst maintaining its optimum angle.

### Design and appearance

User comfort has been one of the essential design briefs in the development of this Lifejacket. Ergonomically designed to work with your body's contours the Crewfit 190N Lifejackets are shorter, lighter and more compact than ever before.

The total freedom of movement that this design gives means this is a Lifejacket you WILL want to wear.

## Will they fit?

Our design team developed an adjustment system that ensures the Lifejacket can be securely fitted safely and easily. Dual side adjusters allow the user to quickly customize the Lifejacket to suit their individual requirements. As with all Crewsaver Lifejackets thigh straps are fitted as standard.

Belt tidies on the waist and thigh straps are provided to avoid snagging and enhance style and appearance.

### Harness option

The rear of the Lifejacket is ergonomically designed to sculpt around the shoulder area and to ensure that any load is distributed evenly across the harness.

Strategically placed mesh panels are engineered to allow technical clothing to stay breathable and to facilitate drainage and moisture evaporation.

### Sprayhood and light

The "Plus" versions of the Crewfit 190N range are also equipped with an integral spray hood and light. Conveniently stowed into the back of the collar the permanently attached hood is deployed and easily accessible when the Lifejacket inflates. The Lifejacket light is fully SOLAS and MCA approved as standard and features an innovative attachment system to ensure excellent visibility.

## Servicing Recommendations

We recommend that all Crewsaver inflatable Lifejackets are serviced annually by our approved Crewsaver Service Station, detailed below.

Your Lifejacket is an important piece of technical safety equipment. At Crewsaver we take great care in its manufacture and it is designed so that many parts can be repaired or replaced if damaged. In most cases this avoids the cost of complete replacement.

If the Lifejacket has been damaged, or you would just like it checked over, we will be happy to inspect, repair and service it for a reasonable charge.

The complete Lifejacket should be sent, post paid, direct to Crewsaver - not to your Chandler. If you require a quotation before the work is carried out, please include a request with the Lifejacket. Please allow up to 28 days for the work to be completed.

Under no circumstances should you try to repair a Lifejacket yourself. The glues you use may not be effective and could make further repairs by us impossible.

If you are in any doubt about its serviceability it should either be replaced or returned to Crewsaver at the address below for testing and repair.

### Crewsaver Service Station

Service & Repair Department, Crewsaver  
Mumby Road, Gosport, Hampshire PO12 1AQ United Kingdom

# Inflatable Lifejackets Accessories

Crewsaver produce a full range of accessories to complement your Lifejacket. Where necessary, detailed instructions are supplied with each accessory pack. These can be found at your local Crewsaver stockist.

## Whistle

- Spare/Replacement whistle
- Non-clog design
- EN 394 Approved

10677 Orange

## Lifejacket Spray Hood

- Stored in a pouch on the waist belt
- Fits over the wearer's head and the inflated Lifejacket
- Reduces spray being inhaled
- Makes the wearer more visible

10040 Red (not suitable for Crewfit 290N range)  
10050 Blue (not suitable for Crewfit 290N range)

## Thigh Straps

- Hold the wearer in a safer position when in the water
- Can be retro fitted to all Crewsaver Inflatable Lifejackets
- Detailed instructions included

10032

## Flare Pocket

- Holds a single day/night flare (not provided)
- Fits onto the Lifejacket waist belt
- Flare secured in pocket by Velcro flap

10303 Red Outer (up to 35mm Dia x 190mm)  
10304 Red Outer (up to 50mm Dia x 150mm)

## Lifejacket Light

- Approved to IMO SOLAS, MED, MCA and RORC requirements
- Flashing "all around" light
- Battery powered
- Detailed instructions included

10219

## Lifebuoy Light

- Operates automatically when thrown overboard with a lifebuoy in a man-overboard emergency
- Advanced LED technology
- Enhanced reliability

10223  
18

## Retro Tape Kit

- Self-adhesive SOLAS approved retro-reflective tape
- 8 x 10 cm strips
- Can be retro fitted to any product to improve visibility

10022

# Safety Lines

Crewsaver manufacture a comprehensive range of Safety Lines with 25mm webbing, CE Approved to European Standards, that can be worn with all types of Crewsaver Lifejackets and Harnesses. They can be purchased with either an Asymmetric or a Self Locking hook attached. The Self Locking version cannot be opened by accident and is a standard fit to our child safety lines.

## Load Indicator Option

Safety lines can be bought either with or without a load indicator

- The indicator activates when the line is placed under an excessive load (7000 – 9000 Newtons)
- When Warning Label is exposed, on indicator versions, the safety line should be replaced as soon as possible

Before activation

After activation

## Self Locking with or without Load Indicator

### With Load Indicator

3035-SL1	2 Hook, 1 metre
3035-SL2	2 Hook, 2 metres
3035-SL3	3 Hook, 2 metres
3035-ELS	2 Hook Elasticated, 2 metres

### Without Load Indicator

3030-SL2	2 Hook, 2 metres
3030-SL3	3 Hook, 2 metres
3030-ELS	2 Hook Elasticated, 2 metres

## Child Self Locking

3030-CH1 1 Hook, 1.5 metre

## Asymmetric

# Harnesses

Available from Crewsaver is a full range of 50mm webbing Harnesses, CE Approved to European Standards. High quality 316 Marine Grade stainless steel is used to form the ‘D’ rings. All models also have back separators to stop straps from getting tangled and shoulder straps to stop them from slipping off.

## Sovereign Adult

- 50mm nylon webbing
- Anti-tangle back panel keeps straps in place
- Stainless steel buckle and ‘D’ ring attachment point
- Automatic machine stitching for consistent quality and strength
- Contrast coloured stitching to ease inspection and to comply with CE Standards

10089 Adult

## Venturer Child/Junior

- 35mm nylon webbing
- Anti-tangle back panel keeps straps in place
- Stainless steel shoulder adjuster slides and buckle
- Fully adjustable shoulder straps and waist
- ‘D’ ring attachment point
- Can be worn back or front
- Contrast coloured stitching to ease inspection and to comply with CE Standards

3011 Child, Junior

## Crewlift 40 Bosuns Chair

- PVC coated nylon
- Two stainless steel attachment welded triangles
- Removable wooden seat
- Adjustable waist belt and thigh straps
- Detachable tool pouch with webbing tool rack

# Drysuits

Ensuring you are **dry, comfortable**  
and **performing** at your  
**maximum**

## Drysuits & Sailing Clothing Fabrics

### HYPERDRY

#### Hyperdry

This durable and highly technical fabric provides the optimum defence system against the elements. Its construction provides total wind and water protection ensuring comfort, flexibility, durability and increased body performance.

### HYPERDRY BREATHABLE

#### Hyperdry Breathable

This hard wearing, 2 layer, fully breathable fabric is designed to provide comfort and protection in a wide range of activities and weather conditions. Its highly technical construction provides total wind and water protection whilst allowing condensation and perspiration from your body to escape.

### HYPERDRY 2 BREATHABLE

#### Hyperdry Breathable 2

This 2 layer, fully breathable fabric with additional strengthening is designed to provide increased durability and protection against the elements. Its highly technical construction offers total wind and water protection, whilst allowing the body to breathe and ensuring high levels of comfort and performance.

### HYPERDRY 3 BREATHABLE

#### Hyperdry Breathable 3

This high quality 3 layer fabric is designed for maximum protection without compromising performance. A hard wearing waterproof and windproof outer protects the central breathable layer, whilst the scrim inner lining wicks moisture away from the body ensuring high levels of comfort and performance even in the worst conditions.

### HYPERDRY 4 BREATHABLE

#### Hyperdry Breathable 4

This high quality 3 layer fabric with additional strengthening provides extreme durability and protection against the elements. Engineered for maximum performance, its flexible yet wear resistant construction ensures great freedom of movement whilst keeping the wearer warm and dry even in the most extreme conditions.

To prolong the operational lifetime of your Drysuit, please follow the Care and Maintenance instructions detailed on our website [www.crewsaver.co.uk](http://www.crewsaver.co.uk)

# Inflatable products

Crewsaver manufacture a full range of inflatable Mark Buoys and buoyancy bags. A complete personalised design service is also available to suit individual requirements.

## Customised Mark Buoys

A complete personalised design service is available at Crewsaver. We can put your logo or lettering onto a buoy, providing the perfect form of advertising. Other colour buoys are available to suit requirements.

Previous commissions include beer cans, coffee jars and many others including swim marks for the Commonwealth Games.

Our standard range is also available in 7 colours to special order.

## Inflatable Mark Buoys

- Hard wearing construction
- Double skin with inner inflation chamber
- Comes with fitted mooring harness
- Standard bright orange finish for high visibility

Code	Buoy Style	Height	Diameter
3810	Cylindrical	1.2m (4')	0.6m (2')
3810	Cylindrical	1.5m (5')	0.75m (2'6")
3810	Cylindrical	1.8m (6')	0.75m (2'6")
3810	Cylindrical	2.1m (7')	1m (3'3")
3810	Cylindrical	2.7m (9')	1.15m (3'10")
3811	Dumpy	0.75m (2'6")	0.75m (2'6")
3811	Dumpy	1.5m (5')	1.15m (3'10")

## Heavy Duty Training Mark

- Bright orange with black stripe for high visibility
- PU coated nylon
- High frequency welded inflator
- Comes with flag pole holder and pocket for strengthening baton
- Internal 'Sand' bag for maintaining vertical altitude
- Three webbing handles and strengthened webbing construction
- Can be packed flat – when sand bag is empty

**10074** Height 1.9m (6' 3") Diameter approx. 0.3m (1')

## Pyramid Mark Buoy

- 1.5 mm sides
- Used at racing events worldwide
- Hard wearing highly visible construction
- Double skin with inner inflation
- Mooring harness fitted

**10076**

## Training Mark

- Simple training aid
- Ideal for Sailing Schools
- Mouth inflation
- Strap for easy recovery

**10079** Height 1.3m (4' 6") Diameter approx. 0.3m (1')

## Buoyancy Bags

- PU coated nylon
- Welded construction
- Long lasting and abrasion resistant
- Bag sizes to fit most dinghy classes
- 18 to 193 litres of buoyancy

## Mast Floats

- New heavy duty fabric for increased durability
- Greatly reduce the risk of damage and injury caused by capsizing and sinking
- Available in 9 or 40 litres of buoyancy
- Designed in conjunction with sailing centres in both the UK and abroad
- Only effective when correct buoyancy float is fitted, owners are responsible

(Crewsaver Mast Floats do not guarantee to stop a boat inverting. The Mast Floats performance will be hindered by conditions of strong tide, wind or swell or incorrect safety procedure.)

N.B. Not suitable for boats without anchoring points.

**10085** 9 litre

**10086** 40 litre

Please contact Crewsaver or your local retailer for more information

# Crewsaver Fishing Range

Designed to meet the needs and **technical** requirements of an enthusiastic angler, the Crewsaver Fishing Range provides **practicality, safety and support.**

## Crewfit 150N

- An ideal everyday use Lifejacket
- Fitted with quick lock high strength plastic buckle

# CE Categories

It is important that you pick the correct CE Category to suit your type of activity and experience. If you are at all concerned please contact Crewsaver for more information.

Lif jackets and Buoyancy Aids are tested and rated to specific European Standards and split into CE categories. These are the universal criteria that define each product and the environment they are suitable for. Crewsaver's range is split into four CE categories: 275N, 150N, 100N and 50N.

Products newly designed, developed and introduced to market will now carry the CE mark and approved to BSEN ISO 12402.

Conditions	A high performance device for offshore and severe conditions, when maximum protection is required or where heavy waterproof clothing is worn.	For use in all but the most severe conditions.	They give a reasonable assurance of safety from drowning in relatively calm water.	Sheltered water use where help is close at hand.
Assurance	They give improved assurance of safety from drowning, to people who are not able to help themselves.	They will give reasonable assurance of safety from drowning, to people not fully capable of helping themselves.	They give a reasonable assurance of safety from drowning in relatively calm water.	Sheltered water use where help is close at hand.
Protection	While they cannot be guaranteed to self-right an unconscious user wearing heavy waterproofs, the buoyancy they provide should ensure they will, in the great majority of cases.	May not immediately self right an unconscious user wearing heavy waterproof clothing. Equivalent performance to previous BSI Approved Lifejackets.	Not guaranteed to self right an unconscious user wearing waterproof clothing and should not be expected to protect the airway of an unconscious person in rough water.	Only provides support to conscious people who can help themselves.

All Crewsaver Lifejackets are designed and manufactured to combined British and European standards. All Lifejackets carry the CE symbol which shows that the lifejacket has been independently assessed and approved to these standards by an authorised test house. These standards are intended to ensure that all Lifejackets sold in this country meet very stringent requirements regarding the design, performance, materials and components used and even given guidelines regarding the information to be provided to the customer about the Lifejacket.

The information within this table is a guide only. The final purchasing decision and liability thereof is left to the individual.

## QUALITY STANDARDS

All Crewsaver Lifejackets, Buoyancy Aids, Harnesses and Safety Lines are fully Approved and CE Marked.

### What is required?

All Crewsaver Lifejackets are designed and manufactured to combined British and European standards. All Lifejackets carry the CE symbol which shows that the lifejacket has been independently assessed and approved to these standards by an authorised test house. These standards are intended to ensure that all Lifejackets sold in this country meet very stringent requirements regarding the design, performance, materials and components used and even given guidelines regarding the information to be provided to the customer about the Lifejacket.

### Safety Harnesses EN 1095

The CEN Standard is based on three main reasons for wearing a deck Safety Harness, e.g. to secure the wearer on deck, prevent them from falling into water and to assist their recovery back onto the deck. They are not intended to prevent falls from a height. The Standard also states that in the case of a combined Lifejacket and Safety Harness, both elements must be tested and have separate CE Approval.

### MED Directive

This is the equivalent of the CE Standard for Lifejackets, that must be applied to all SOLAS equipment for use on commercial vessels. Approval to this directive is represented by the ships wheel.

### ISO 9001

Crewsaver is approved by Lloyds Register Quality of Assurance to ISO 9001 the scope of which includes the design and manufacture of marine safety equipment. Part of being an ISO 9001 company requires that during the manufacturing stage, critical materials including all components (inflation chamber material, inflation head,

components of harness and webbing) are batch recorded. This enables each individual component to be targeted and isolated, should a Quality Control Manager not be 100% certain that it is safe for production use.

### How is quality controlled during the manufacturing process?

At Crewsaver the manufacture of life saving equipment is never taken lightly. As legislation toughens, Crewsaver are always one step ahead to ensure that the final product supplied to you is above the basic level of quality required.

Testing is continuous throughout the manufacturing cycle of each inflatable Lifejacket. For example the inflation chambers of the Lifejackets are manufactured in batches. The first inflation chamber from each batch is subjected to a test whereby it is inflated manually to a specified pressure, the equivalent of a double inflation.

When might a Lifejacket double inflate in real use? On sensing danger, and as a precaution, the wearer might inflate the Lifejacket by mouth. If the wearer then enters the water, and the Lifejacket is automatically operated, the CO<sub>2</sub> cylinder would then discharge into the inflation chamber, thus causing a double inflation.

On completion of the batch each inflation chamber is inflated to 3lb/sq inch and must maintain that pressure for 30 minutes. After the inflation chambers have been sewn into the Lifejackets, the completed Lifejackets are passed to our Packing Department where they are subjected to a further inflation test of 30 minutes at 3lb/sq inch.

Finally each Lifejacket is carefully inspected for any minor flaws or imperfections before it is packed ready to send out.
